

TotalCare for Laser Printers

*Extend your laser printer's life and save on expensive repairs with
TOTALCARE for Laser Printers Service and Maintenance Program*

Printers are prone to a lot more wear and tear than other computer equipment. Paper dust and other build-up can result in poor print quality and will often lead to more serious problems. Pick-up rollers wear over time leading to annoying paper jams. We strongly advocate regular preventative maintenance to help maintain excellent output quality and reduce the possibility of expensive repairs.

Our TotalCare Service & Maintenance for laser printers program combines the features of a manufacturers warranty program and an annual maintenance program.

Here's an example of how you save with TotalCare.

If you purchase our TotalCare 1 Year service & maintenance coverage for one printer, your cost is \$199

That breaks down to just \$16.58 per month for total protection!

That includes parts, labor, travel, and annual maintenance.
Compare this to the national average for a departmental class printer repair - \$250

Laser printer maintenance includes the following:

Verifying all parts are in good operating condition, reconditioning the pickup and feed rollers, cleaning out the paper path, cleaning all high voltage contacts, checking the condition of the fusing element, confirming that all paper sensors toggle properly, blowing out any printer fans, testing printer for print quality and confirming all input trays pull paper, verifying print quality, and providing customer with a report of printer condition.

Annual maintenance is performed once during the TotalCare contract or upon customer request.

TotalCare Prices

One Printer - \$199 annually

Plan includes parts, labor, travel, priority response and annual maintenance.
