Desktop Management

Piriform has become a global leader in PC optimization software by creating award-winning products that make computers faster, cleaner and more secure.

In fact, the company's flagship product, CCleaner, has been installed more than 1 Billion times worldwide. By using the patented CCleaner software, LabTech's partners can create a consistently optimized computing environment for their clients, increasing productivity and improving satisfaction, while saving on help desk costs.

CCleaner and LabTech Integration

CCleaner integrates with LabTech to automate endpoint cleaning schedules. By taking a proactive approach to optimizing the end-user experience, the burden of helpdesk calls will be reduced along with unnecessary tickets and service calls.

CCleaner Business Edition Features

- **Automatic Cleaning** – Through integration with LabTech, CCleaner can be scheduled to clean and optimize across profiles automatically.
- **Endpoint Optimization** – CCleaner cleans out unnecessary files to free up valuable hard drive space, clears old registries that lead to instability and erases cookies from endpoints to keep client data confidential and secure.
- **Stop Unnecessary Programs** – CCleaner stops Windows from running unnecessary background programs during startup that slow down endpoints. The result is faster boot times for end-users.
- **Eliminate Disruptions** – Endpoints are cleaned quickly so end-users never experience downtime.
- **Robust Reporting** – Reporting features – daily, weekly, monthly – allow you to demonstrate value to your clients.
- **Supports All Endpoints** – All Microsoft Windows-based physical endpoints, virtual endpoints, servers and terminal services are supported.
- **Simplified Cleaning for Multi-User Endpoints** – All user accounts on a multi-user endpoint can be cleaned at once.

CCleaner Business Edition Benefits

- **Reduce Unnecessary Tickets and Unplanned Visits** – With CCleaner and LabTech, technicians can set automatic cleaning schedules to ensure endpoints are always running optimally, thereby eliminating unnecessary tickets and unplanned service visits.
- **Gain A Competitive Edge** – You will exceed your clients' expectations by maximizing their current infrastructure and increasing ROI on their hardware.
- **Increase Revenue** – CCleaner provides the opportunity to increase your business's revenue by adding a low maintenance managed service to your offering.
- **Technical Support** – Highly trained LabTech Software technical representatives can be contacted for issue resolution.
- **Maximize Results with Minimal Effort** – By ensuring endpoints are consistently running optimally, technician time can be used for real issues.
- **Proven Technology** – CCleaner Business Edition has been tested to the highest standard and uses approved technology. It is Microsoft-certified for compatibility with Windows and code signed by VeriSign.

CCleaner Business Edition System Requirements
