

The Cost of Doing Nothing

Time to Refresh your Devices with the Latest Technologies Powered by Windows 10 Pro Solutions

Your older devices are expensive in more ways than one. You could be spending **1.5x more in repairs** and an additional **\$1700 a year in maintenance costs**, on average.

Not to mention decreased productivity costs, security risks and limited performance.

Can you afford the cost of doing nothing?

Older PCs can only run about 5 applications simultaneously without performance degradation, while **newer PCs can easily run 8 or more.**

Devices over 5 years old are past their prime, performing **2.5x slower** with **3x less battery life** and wake up and **sleep mode 4x slower** than new Windows 10 Pro devices.

More than **50% of small businesses have suffered a data breach** or cyberattack averaging more than **\$84,000 per breach.**

The Cost of Doing Nothing

 **Windows 10 Pro**
Lenovo recommends Windows 10 Pro

Heritage Technology Solutions | htspc.com

The way we work has changed over the last 4 years but if your technology has stayed the same you're not keeping up with the way your competitors' organizations are working, nor are you supporting the way employees work.

Is it stifling growth?

Is it stifling innovation?

Is it costing my employees from having the tools necessary to succeed?

Am I putting the organization at risk?

Have I put the total economic impact together for not doing this?

Lenovo devices with Windows 10 Pro are the foundation for digital transformation

- Advanced security protection
- Designed for Modern IT
- More productive experience & devices

**The most secure Windows ever:
Windows 10 Pro on modern Lenovo devices**

Contact us today to learn more about refreshing your devices!
